Information and consent for the use of Dytective

School, organisation or professional: _____

Our school uses **Dytective**, a digital tool by Change Dyslexia, scientifically validated (in Spanish), that detects the risk of reading and writing difficulties, such as dyslexia, and helps to improve these skills with exercises in the form of an educational game. Before your son or daughter uses it, we explain what data is processed and ask for your consent.

Who processes the data?

- **Controller: our school**, which decides to use Dytective and registers the pupils. Contact: _____. The school's Data Protection Officer, if it has one: _____.
- **Processor: Change Dyslexia S.L.** (tax ID B66670878, Lope de Rueda 49, 4.º A, 28009 Madrid, Spain), which processes the data only on behalf of the school and on its instructions, under a Data Processing Agreement. Its Data Protection Officer can be contacted at dpo@changedyslexia.org.

What data?

- A username and a password. **We do not use the pupil's real name** as the username.
- Date of birth, sex and language.
- Four yes/no answers: whether their first language is the language in which they use Dytective (Spanish or Catalan), whether they have ever failed language at school, whether they can already read and whether they are bilingual.
- The answers to the screening test and its result.
- Their activity in the exercises: sessions, levels, correct answers and errors.

The result of the screening test is data concerning health, which the law gives special protection. The test indicates whether there is a risk of reading and writing difficulties; **it is not a diagnosis**.

What for?

- To run the screening test and find out its result.
- To offer the pupil exercises adapted to their age and level, and to follow their progress.
- To prepare the activity and progress reports consulted by the school.

The results of all pupils are also used, aggregated and without identifying anyone, to calculate averages by age that make it possible to compare each pupil with the average for children of their age.

Who is the data shared with?

Only with Change Dyslexia and the providers it needs to deliver the service. The data is stored in the European Union; some of those providers are based in the United States and may access it from there, with the safeguards required by law. The list is in the Change Dyslexia privacy policy (www.changedyslexia.org/privacy-policy).

Only for schools in the "la Caixa" Foundation programme

If the school does not take part in the programme, it must delete this section.

Our school uses Dytective free of charge thanks to the "la Caixa" Foundation programme. As a condition of that programme:

- Change Dyslexia delivers to **"la Caixa" Foundation**, so that it can measure the impact of the programme and produce statistics on the prevalence of dyslexia in Spain, data about each pupil **with nothing that identifies them**: the school, sex, year of birth, language, their activity and whether the latest screening test indicated a risk. "la Caixa" Foundation does not receive any pupil identifier or their username.
- A **university research group** receives anonymised data about the pupils (with nothing that makes it possible to know who each one is) to study the impact of the programme. The school can object to this delivery.

For how long?

For as long as the pupil uses Dytective at the school. When the school removes the pupil, their data is permanently erased from 30 days onwards. If the school's account is not used for two years, it is also erased.

Your rights

You can ask at any time to access your son's or daughter's data, correct it, delete it, object to its use, restrict its use or take it to another service, and you can withdraw this consent (without affecting what has already been done). Please contact the school, using the contact details given above. If you consider that your rights have not been respected, you can lodge a complaint with the Spanish Data Protection Agency (Agencia Española de Protección de Datos, AEPD) (www.aepd.es).

Consent

Pupil's name: _____ Year: _____

We have read this information and **give our consent** for the school to use Dytective with our son or daughter, including the screening test, the result of which is data concerning health, on the terms described here.

Mother, father or legal guardian
